

CARE FOR OUR TREES

While planting native trees is important for our environment, the Green Team also encourages residents to keep and maintain healthy mature trees on their properties.

Trees provide so much more than beauty and shade. Trees can help—

- Lower blood pressure and stress levels
- Improve some respiratory conditions
- Improve air quality
- Improve walkability
- Reduce water runoff
- Reduce energy costs
- Conserve water
- Lower crime rates
- Control soil erosion
- Remove carbon from the atmosphere
- Increase the life of asphalt/hard surfaces
- Support local ecosystems
- Add to property values
